Fiido L3, the longest lasting e-bike under $1500

Fiido L3 is an e-bike with a long range released in Jan 2021. With two years of positive feedback from the market and our user base, L3 has proved to be the longest-lasting e-bike under USD 1500 with its outstanding performance.

The long range gives us significantly more reasons to ride an e-bike. Fiido L3 is not only great for shorter commuting and leisure trips but also excellent for longer trips.

Equipped with a 48V, 1113.6WH battery, and a 350w motor, the Fiido L3 has an incredibly long range of 125 miles with pedal-assist. The three-step folding leads to a mere size of 26.7in*14.5in*25.9in, as compact as a 26-inch suitcase and can be fitted easily into the back of any vehicle or a motorhome.

Equipped with a dropper seat-post and a step-through frame, the L3 is a one-size-fits-all e-bike for anyone between 4.9 and 6.56 feet. Almost anyone from a family can achieve the best riding posture with a simple adjustment of the seat.

Key features:

- 125 miles range (pedal-assist)/80 miles range(throttle)

- Throttle is optional

- One-size-fits-all e-bike for anyone between 4.9 and 6.56 feet

- 350w powerful motor

- Space-saving three-step folding

- Max speed at 18.6MPH

- 48V, 1113.6WH battery

- IP54 waterproof

- Cruise control available
