

Fiido M1 Pro Upgraded Edition: Retro Reborn, Ride Free!

The M1 Pro, a best-selling model proven in the market for five years, returns in 2025 with a refreshed look, blending retro aesthetics with enhanced performance. With bold design and precise power, it allows you to seamlessly switch between urban commuting and light off-road adventures, delivering a versatile riding experience. In the city streets, the M1 Pro is your stylish companion—efficient for commuting and striking in appearance. When heading outdoors, it unleashes the spirit of freedom. Its suspension system and wide tires provide a stable and comfortable ride, turning every journey into an exhilarating adventure. Now, let's unveil its new identity together!

Neo-Retro Motorcycle Aesthetics , A Bold Expression of Style and Power

The newly upgrade M1 pro draws inspiration from 1960s to 1980s motorcycle aesthetics, incorporating a bold color-blocking design that stands out. The deep green base is accented with gold, red, and blue, paying homage to classic off-road motorcycles. The earth-toned sidewall tires echo the rugged style of iconic off-road SUVs, blending vintage charm with modern functionality. More individuality, more style—all-new 2025 upgraded M1 Pro and let you become the center of attention on the streets!

Seamless Power Delivery for Precise Control

The upgraded Mivice S200 torque sensor analyzes pedal pressure within 0.01 seconds, optimizing pedaling efficiency and ensuring that every pedal stroke is converted into controlled, responsive propulsion. Paired with a 250W high-speed brushless geared motor that provides 55 Nm of torque—more than enough for climbing hills and ensuring smooth rides over rugged terrain. Whether on smooth city roads or rugged mountain trails, you can ride effortlessly and enjoy freedom.

All-Terrain Comfort Riding

The M1 Pro features a dual-crown fork with 80mm suspension travel (front fork) and rear shock absorber, transforming road vibrations into gentle undulations. This effectively reduces wrist and forearm fatigue, enhancing overall riding comfort. Compared to the industry-standard front suspension with 40-60mm travel, the M1 Pro's front and rear suspension system delivers a more comprehensive cushioning effect, making it ideal for riders who frequently transition between different terrains.

The 4.0-inch wide tires provide a larger contact patch, improving stability, especially on rough and uneven terrain. The reinforced tire sidewalls effectively absorb vibrations,

ensuring a smoother and more comfortable ride, even on long journeys without excessive fatigue from bumpy roads.

Additionally, the VELO wide saddle minimizes hip discomfort and offers better support, allowing for extended rides without strain.

High-Performance Braking for Enhanced Safety

The M1 Pro is equipped with a hydraulic disc brake system, delivering fast, precise, and controlled braking for a stable and safe riding experience. Additionally, the bright front light and rear brake light improve nighttime visibility, with the rear brake light automatically activating as a warning signal when braking. This significantly enhances safety during night rides.

Low Maintenance Design: Ride with Peace of Mind

The M1 Pro features a maintenance-free hub design, effectively preventing spoke breakage during high-intensity rides or when the bike is fully loaded, thus improving durability and stability. The puncture-resistant tires significantly reduce the risk of flats or leaks, allowing you to ride with confidence without worrying about unexpected issues. Additionally, the nickel-plated freewheel helps prevent rust, making it resistant to damage from dirt, rain, or sweat, ensuring long-lasting durability.

Power, Durability, and Convenience , Your Companion for Commuting and Adventure

The M1 Pro features a 7-speed mechanical gear system with an 11-32T gear range, easily tackling light off-road slopes and urban rides. Its removable battery design allows you to charge anytime, anywhere—whether at home, in the office, or while on the go. Plus, it includes automatic cut-off protection to prevent overcharging, so you can charge overnight and wake up to a fully charged bike, without the need for constant monitoring.

With an IP54 waterproof rating for the entire ebike and IP67 for the torque sensor and display, you can confidently ride in the rain. The 2.4-inch color IPS LCD screen remains clear and readable even under direct sunlight, ensuring visibility in any conditions.

A Perfect Fusion of Style, Performance, and Value

The newly upgraded M1 Pro combines style and performance with its bold Neo-Retro design and strong features. With a full suspension system for smooth rides, and the Mivice S200 torque sensor for effortless pedaling, it offers both aesthetic appeal and

exceptional riding experience.

Even with these significant improvements, the M1 pro remains highly cost-effective. With a special spring promotion price of just \$1099/€1099 (original price \$1499/€1499), you save \$400/€400 while still enjoying top-tier performance. This reflects our mission "Bringing cutting-edge technology to everyone at a lower cost." Whether you're commuting through the city or embarking on weekend adventures, the M1 pro enhances every ride with unmatched style, performance, and freedom.

Product Specification :

Basic Info	Product Name	M1 pro
	Color	Color blocking
	Product Size	1750*580*1060 mm
	Tire Size	CST 20*4.0 inch
	Saddle Height	830~1060 mm / 32.68-41.73 in
	Net Weight	26.8 kg / 59.1 lbs
	Package/Gross Weight	33.4 kg / 73.6 lbs
	Maximum Load	120 kg / 264.6 lbs
	Rider Height Range	155cm(5'1") - 200cm(6'7")
Vehicle Parameters	Frame Material	Aluminum
	Max Climbing Ability	Dual-crown fork (80mm travel)
	Gear System	SHIMANO 7S
	Brake Type	Hydraulic disc brakes (with power cut-off)
	Drive System	Rear hub motor
	Pedal Assist	Torque Sensor (Mivice S200)
	Top Speed on Throttle	6 km/h (3.7 mph)
	Top Speed	25 km/h (15.54 mph)
	ECO Range (Pedal Assist)	85.93 km
	Push Assit Mode	6km/h
	Water Resistance	IP54
Battery Parameters	Battery Voltage	48V
	Battery Capacity	556.8 Wh
	Low Voltage Protection	39±1 V
	Battery Type	Li-ion battery
	Removable Battery	Yes
	Charging Time	7 hours
Motor Parameters	Rated Power	250W

	Max Torque	55 N·m
Other	Headlight	LED
	Tail Light	LED
	Cruise Control	Switchable
