

Fiido Nomads Touring E-Bike: Power of Freedom

Berlin, June 17th – This summer, Fiido brings a new option to long-distance riders and travelers.

Launching this June, the all-new Fiido Nomads is a versatile touring e-bike that combines long range, comfort, and a spirit of exploration. It makes spontaneous travel easier than ever. Built for meaningful journeys, and the days in between, Fiido Nomads is here to support your rides — near, far, and farther — with ease and confidence.

From City Streets to the Open Road

Nomads is made for meaningful journeys, the kind that take you somewhere new, or simply let you enjoy the ride. On longer trips, what holds riders back isn't always fatigue, but the worry of running out of power. That's why Nomads is built not just for distance, but for confidence helping you keep going.

One battery is enough to take you across town for that long-awaited meetup (up to 79km). Add two more, and a weekend getaway with a sunset and a ride home (200km+) is well within reach. Fiido's 3-battery structure is easy to swap and recharge whether you're at home, by the campfire, or stopping for a mid-ride coffee. Going the distance isn't the hard part but riding with peace of mind is. That's exactly what the Nomads is built for.

The Secret to Long-Lasting Comfort

Nomads combines a thoughtfully engineered XC-style frame geometry, a 120mm front suspension fork, and efficient 29×2.1 tires to deliver a stable and smooth ride over long distances without the drag of oversized fat tires. The Nomads is built with comfort and accessibility in mind making long rides easier, not harder. Every detail is designed to help more people ride farther, with less effort.

The XC geometry promotes a natural, relaxed riding posture. Its long-travel suspension easily handles gravel, soft dirt, or uneven roads. It is also well beyond the typical 60–100mm found in this category. An ergonomic saddle and adjustable handlebar help maintain proper support and reduce fatigue, giving you a ride quality that feels closer to a lightweight touring motorcycle.

Available in M and L frame sizes, it's especially suited for riders 170–205 cm tall.

Effortless Support, Natural Ride

Equipped with a 250W rear hub motor and a Mivice S200 torque sensor. Nomads delivers just the right amount of power exactly when you need it. Hills feel easier, acceleration becomes smoother, and range remains steady and reliable. This responsive configuration feels more like a natural extension of your legs, so you can focus on the road ahead, the wind in your face, and the freedom of the ride.

Built to Handle Any Terrain

With a Shimano 9-speed drivetrain and an optional cruise mode, Nomads adapts to whatever road lies ahead, whether winding mountain paths, gravel backroads, or paved city streets.

The bike is rated IP54 for dust and water resistance, offering dependable performance through unexpected weather or rough terrain. And while capable, the Nomads remains easy to handle. So that ideal for riders who enjoy lakefront rides, riverside camping, or countryside touring.

Ready for the Journey: High Load Capacity & Gear Compatibility

Nomads comes ready for adventure, with optional front and rear racks and a total payload capacity of 120 kg. Tents, sleeping bags, cookware, or even a travel crate for your pet, you'll have the space and support to bring what you need, without the hassle of overpacking.

Ride Safe, Ride Smart

An integrated display gives you instant access to key riding data like battery level, speed, and trip distance. Bright LED headlights and turn indicators improve visibility and help keep you safe during night rides or on busy roads.

Fiido Nomads: The Journey Starts Here

The name "Nomads" draws inspiration from the spirit of exploration. About a flexible, free, and open-minded approach to travel. Fiido Nomads Touring E-Bike, equipped with a three battery structure and features designed for long-distance travel, offers riders the freedom to journey further with peace of mind. Fiido Nomads stands for a community of explorers—adventuring together with Fiido, breaking boundaries, and turning every ride into a journey of freedom and discovery.

Some e-bikes make freedom feel complicated of limited range, high costs, charging stress. By focusing on features that truly enhance the riding experience, Nomads offers impressive performance at an accessible price point.

Stay tuned for early bird pricing this August! The price designed to make long-distance e-bike touring more achievable for everyone.

With comfort as its foundation and reliability as its promise, the Fiido Nomads is built to take you further and help you explore more.

Technical Specification

Basic Info	Product Name	Fiido Nomads
	Color	Nomads White
	Product Size	M: 1923*695*1110 mm L: 1975*695*1115 mm
	Tire Size	CST 29*2.1" inch
	Saddle Height	M: 850~1020 mm / 33.5 ~ 40.2 in L: 900~1080 mm / 35.4 ~ 42.5 in
	Net Weight	24.7kg / 54.5 lbs
	Package/Gross Weight	32.4kg / 71.4 lbs
	Maximum Load	120 kg / 264.6 lbs
	Rider Height Range	M: 170cm (5'7") - 190cm (6'3") L: 190cm (6'3") - 205cm (6'9")
Vehicle Parameters	Frame Material	Aluminum
	Gear System	SHIMANO 9S
	Brake Type	TEKTRO HD-M275 Hydraulic Disc Brake
	Drive System	Rear hub motor
	Pedal Assist	Mivice S200 Torque Sensor
	Suspension Type and Travel	Front Suspension: Oil-Spring, 120mm Travel
	Top Speed	25 km/h (15.54 mph)
	ECO Range (Pedal Assist)	79.36 km
	Water Resistance	IP54
Battery Parameters	Battery Voltage	36V
	Battery Capacity	417.6 Wh / 11.6AH

	Low Voltage Protection	29±1 V
	Battery Type	Li-ion battery
	Removable Battery	Yes
	Charging Time	7 hours
Motor Parameters	Rated Power	250W Permanent Magnet Brushless Geared Motor
Other	Headlight	LED
	Tail Light	LED
	Cruise Control	Switchable
