

Fiido T2 2025 – Go Farther, Carry More, and Ride Smarter with the Ultimate Longtail Cargo E-Bike!

Autoevolution describes it as a *"robust industrial-style longtail cargo e-bike, designed to be a reliable and compliant workhorse, whether you're dropping kids off at school, hauling gear, shopping for groceries, or making deliveries."* Yes, our T2 was met with great enthusiasm upon its release in 2024, and after gathering valuable feedback from our loyal T2 users, the T2 2025 retains its original, sturdy, and multifunctional design while introducing key upgrades to essential components! Whether you're looking for a versatile cargo e-bike to transport kids, pets, or goods, need to install a foldable cargo box, add a child seat and safety barrier, or require extra space for cargo or a customizable trailer, the T2 2025 is built to meet your needs.

Upgraded Torque, Greater Range, Safer Journeys

The T2 2025 comes with two key upgrades that make it more efficient and longer range than ever before. The T2 2025 now upgrades from a cadence sensor to the advanced **Mivice S200 torque sensor**, delivering a significant performance boost. This cutting-edge system analyzes pedal pressure within an astonishing 10ms, providing smoother and more precise power assistance for a more natural riding experience. Paired with a **250W high-speed brushless motor**, it enhances efficiency, extends range up to **136.26 km** from the previous 111 km, and delivers a quieter, smoother ride with lower friction, higher RPMs. Additionally, the T2 2025 features a **push-assist mode**, providing up to **6 km/h** of powered support to help navigate slopes, all while staying fully compliant with EU regulations. Enjoy a safe and smooth ride on public roads.

In practical riding scenarios, the Mivice S200 torque sensor truly shines. When you're hauling heavier cargo and need to climb a steep incline, the sensor delivers extra power assistance, helping you tackle the slope with ease and reducing fatigue. On the other hand, when you're riding with children, the torque sensor ensures smoother, more natural power delivery, preventing any sudden surges or jolts in acceleration or deceleration. This creates a safer, more comfortable ride for both you and your child, giving you peace of mind as you enjoy your ride together.

Exceptional Load Capacity, Built to Last

The T2 2025 features an impressive 200kg total weight capacity, providing stable and reliable support for various travel scenarios. The durable aluminum alloy frame, combined with a seat capable of supporting up to 120kg and a reinforced rear rack, ensures flexible and secure front and rear loading. Additionally, the T2 2025 supports 12 different accessories for versatile customization, making the most efficient use of every inch of space.

Family-Friendly Design, Comfort and Convenience

When you receive your T2, it comes with a free, non-enclosed front basket and rear divider. The step-through frame design ensures effortless on and off access, especially for parents with little ones in tow. For families with children aged 2-5, you can easily attach a child trailer to the back. The T2 2025, equipped with a Shimano 7-speed system, offers greater flexibility, allowing for seamless gear shifts to ensure a smooth and enjoyable

riding experience. When you shift to a lower gear, it helps maintain a comfortable pedaling speed, reducing leg strain during your ride. Need to stop for groceries on the way? Add the enclosed front basket to securely carry your purchases. The four-piston hydraulic disc brakes with 230mm brake rotors provide reliable stopping power, ensuring you can brake safely and steadily at all times, even when carrying extra weight. Worried about your baby needing constant attention while riding? The rearview mirror allows you to keep an eye on both the road ahead and your little one in the back.

Everyone's Favorite, Effortless Rides for All

We also offer a range of trailer options, including a specialized cargo trailer, perfect for hauling goods, and a pet trailer so you can bring along your furry friends. Want to get closer to your child during the ride? Choose the child safety enclosure with a seat pad and add the rear support footrests, allowing your child to rest their feet safely without the risk of getting caught in the wheels. Additionally, the aluminum alloy hydraulic suspension front fork, with 60mm of travel, ensures a smoother ride even over rough terrain, offering added comfort and stability for both you and your child. The full-support kickstand ensures that whether you're carrying children or heavy cargo, the ebike remains stable when you stop, offering you peace of mind and convenience.

Perfect for Solo Cargo Transport

The T2 2025 also doubles as a reliable cargo ebike for solo trips. The enclosed front basket can be mounted on the rear, transforming it into a spacious rear basket. You can also add additional side panniers, a zippered rear rack bag, and essential items for safe riding such as a phone holder and helmet. With 12 accessory options to mix and match, it enhances your commuting, delivery, and cargo-carrying experience. With a total weight capacity of 200 kg, you can easily carry everything you need. The CST 20x4.0 wide tires offer excellent grip and enhanced anti-slip performance, providing great stability for carrying heavy loads on various terrains. Worried about running out of battery? The already impressive range can be further extended by adding our range extender battery, allowing you to easily swap out the battery and continue your journey. The IP68-rated display ensures you can ride confidently even in light rain, clearly viewing all important data.

Finally, why choose our accessories? Each one is specially designed to fit the T2 2025, seamlessly enhancing the E-bike's performance and ensuring that your bike is fully equipped to meet your unique needs. The T2 2025 makes cycling more efficient and convenient, allowing you to carry more and store smartly!

Smart and Efficient Control

You can also use our Fiido App to enjoy intelligent and efficient control. The Fiido app makes managing your ride easy and efficient. With just a few taps, you can control power, lights, assist modes, and track your ride data. The streamlined interface saves you time and ensures quick, purposeful adjustments while you ride. Remote firmware updates and social features keep your ebike current and connected, enhancing both your experience and convenience.

Customize your T2 2025 for endless possibilities on the road.

The Fiido T2 2025 is built to offer the ultimate riding experience, providing top-notch performance, versatility, and customization options at an exceptional value of just

\$1499/€1599. Whether you need it for family outings, commuting, or cargo transport, the T2 2025's powerful upgrades and extensive accessory options allow you to tailor the bike to fit your needs perfectly. One photographer has plan their T2 into a mobile photography rig, demonstrating just how versatile this bike can be. We can't wait to see the creative ways you'll use the T2 2025 and how it fits into your daily life. With the T2 2025, you're not just getting a E-bike; you're getting a lifestyle companion built for every ride.

Product Specification :

Basic Info	Product Name	T2 2025
	Color	Grey&Green
	Product Size	1860*730*1190 mm
	Tire Size	CST 20*4.0
	Saddle Height	760~960 mm / 29.92-37.80 in
	Net Weight	39.5 kg / 87.1 lbs
	Gross Weight	48 kg / 105.8 lbs
	Maximum Load	200 kg / 440.92 lbs
	Rider Height Range	155cm(5'1") - 200cm(6'7")
Vehicle Parameters	Frame Material	Aluminum
	Max Climbing Ability	Front oil suspension (60mm travel)
	Gear System	SHIMANO 7S
	Brake Type	Four-piston hydraulic disc brakes (with cut-off)
	Drive System	Rear hub motor
	Pedal Assist	Torque Sensor (Mivice S200)
	Top Speed on Throttle	6 km/h (3.7 mph)
	Top Speed	25 km/h (15.54 mph)
	ECO Range (Pedal Assist)	136.26 km
	Push Assit Mode ()	6km/h
	Water Resistance	IP54
Battery Parameters	Battery Voltage	48V
	Battery Capacity	998.4Wh
	Low Voltage Protection	39±1 V
	Battery Type	Li-ion battery
	Removable Battery	Yes
	Charging Time	7 hours
Motor Parameters	Rated Power	250W
	Max Torque	55 N·m
Other	Headlight	LED
	Tail Light	LED
	Cruise Control	Switchable
