

Titan 2025—The e-Touring Beast, Ready to Meet Your True Needs

As Forbes aptly put it *“Fiido Titan, a powerful and burly fat-tire cargo carrier. With a fresh battery, the ride continues.”* The Titan 2025 takes it even further with the ultra-smooth Mivice S200 torque sensor and a triple battery unlocking method, designed to be your fearless touring companion, transforming you into an all-terrain beast with a range of up to 347km.

Fiido Titan 2025 opens new realms of adventure, empowering riders to embrace the open road for long-distance touring. The new model features the **Mivice S200 millisecond-precise torque sensor**, offering an ultra-smooth ride and seamless assistance. The newly added mechanical key unlock feature gives the Titan 2025 **three versatile unlocking options** (App, password, and mechanical key), greatly enhancing convenience and security. With its upgraded 250W motor, 55Nm torque, and 380RPM speed, you can enjoy an efficient and smooth ride without compromising on performance. And guess what? All of this comes at the same unbeatable price of \$1699/€1699. For US riders, the Titan features a powerful 750W motor, while the EU version complies with a 250W motor. Additionally, the Titan 2025 includes a **push assist mode**, allowing for a throttle speed of up to **6 km/h**. While complying with EU regulations, this mode also makes it easier and less strenuous when pushing the ebike uphill or maneuvering under heavy loads—ideal for the touring rider.

Mivice S200: 10ms Sensitivity, Smooth and Effortless

When you're climbing uphill, the Mivice S200 offers powerful, instantaneous assistance with no delay, making it effortless to ride. On gravel paths, it limits power overload and prevents skidding. On flat roads, it delivers linear output, eliminating any jerky acceleration. This lets you ride further on flat terrain and make climbs more effortless! The Mivice S200 torque sensor uses non-contact technology to smoothly provide the precise power you need, no matter the terrain. As soon as you press down on the pedal, it detects your effort and delivers the perfect level of assist right away. You can easily control your cadence, always staying in command of your ride.

Versatile Battery Unlocking: Security, Convenience, Flexibility

The Fiido Titan 2025 introduces a new mechanical key battery unlocking feature, designed with every rider's convenience in mind. Now, with three unlocking options, it caters to different needs. When parkin, use the Fiido App to unlock and bring the battery inside for charging, offering peace of mind with enhanced anti-theft protection. Forgot to charge your ebike but need it soon? Simply share the battery password with a family member to easily remove and charge it. The mechanical key unlock option serves as a reliable backup, eliminating the hassle of being stranded without a charged battery. The three-tier battery unlocking system makes battery management more flexible and

convenient than ever before.

347km Range—Travel Without Range Worries

Fiido Titan 2025 takes long-distance touring to a whole new aspect. With the industry-first patented triple battery structure, it supports a combination of the main battery and two spare batteries. Equipped with three 696Wh batteries, it offers a maximum range of up to 347km. The battery can be quickly installed in 5 seconds without tools, allowing for easy battery replacement during the ride. Ultra-long range meets instant battery swap — triple-battery ensures seamless long-distance rides. Titan users have praised the spare battery holder, calling it both cool and practical.

Fed up with constantly worrying about your remaining battery life? The Titan 2025 offers the convenience of *charging once a week*—commuters riding 20 km daily can enjoy up to 5 days of riding on a single charge, perfectly covering your daily commute. Powered by the efficient 250W geared brushless motor and Mivice S200 torque sensor, both sensitivity and handling are significantly improved compared to the previous model. Equally reliable, whether for touring or commuting.

200kg Capacity , Carrying Your Life with Ease

The Fiido Titan 2025 has an impressive 200 kg weight capacity, 20-50 kg more than similar products on the market, making it perfect for carrying cargo, passengers, or all aspects of your life in one vehicle. Its aerospace-grade 6061 aluminum alloy frame is robust, durable, and corrosion-resistant, ensuring long-term reliability even under heavy loads. Additionally, the integrated cast wheels eliminate the risk of spoke breakage and reduce maintenance needs. If you want your touring ebike to carry your luggage more easily, offer more reliable durability, and require less maintenance, the Titan 2025 delivers. Every extra bit of effective load capacity and less frequent maintenance means more days of wilderness freedom.

All-Terrain Ready , Fearless of Any Road Condition

The Fiido Titan 2025 is equipped with 26 x 4.0 all-terrain wide tires that combine the advantages of road and off-road tires, making it capable of handling both city streets and forest trails with ease. The tread design features gripping raised patterns, ensuring stable traction on hard surfaces, gravel, and asphalt. With puncture-resistant technology, these tires minimize the risk of flats, making them ideal for more rugged, wild riding paths and reducing the chance of tire damage on outdoor adventures. Paired with Titan, these wide tires enhance off-road performance, allowing you to tackle any terrain without hesitation. The S-RIDE 9-speed shifting system adjusts gear ratios based on slope and surface conditions, ensuring smooth adaptability to varying environments. Additionally, the Titan comes with a four-piston hydraulic disc brake system that delivers 30% more braking

power compared to common single/dual piston systems, reducing stopping distance and improving heat dissipation. The brake system also includes an automatic power cut-off, immediately disengaging the motor during braking for enhanced stability and safety.

User-Friendly Design, One Bike for All

With its user-friendly design and outstanding performance, the Titan 2025 has become a classic model suitable for various people and scenarios. Its center-mounted display features an IPS screen, ensuring clear readability even in bright sunlight, while the IP68 waterproof design keeps you worry-free in any weather. The four physical buttons with backlighting make nighttime operation easy.

The Titan 2025 is equipped with an aluminum alloy hydraulic suspension front fork (60mm travel), which enhances comfort by absorbing shocks and smoothing out rough terrain. The classic step-through frame design allows for easy to get on and off the ebike, while the curved handlebars reduce fatigue during long rides. Equipped with a Velo saddle, the seat is adjustable to fit different heights and body types, providing a comfortable riding experience.

Smart and Efficient Control. The Fiido app makes managing your ride easy and efficient. With just a few taps, you can control power, lights, assist modes, and track your ride data. The streamlined interface saves you time and ensures quick, purposeful adjustments while you ride. Remote firmware updates and social features keep your bike current and connected, enhancing both your experience and convenience.

The Perfect Companion for Touring

An e-bike built for touring must be versatile and durable, capable of tackling rugged terrains like gravel, sand, and steep climbs. The Titan 2025 meets these demands with a robust frame that supports up to 200kg, perfect for carrying camping gear, supplies, or goods. Its maintenance-free integrated hub ensures a smooth ride, while the rear seat can easily accommodate a child seat for family outings, making every adventure even more enjoyable.

Fiido Titan 2025 is available now—same price, better features.

For just \$1699/€1699, whether you're in the US, where the Titan 2025 comes equipped with a powerful 750W motor, or in the EU, where the 250W motor offers the perfect balance of power and efficiency, this upgraded version is designed to meet your needs. At the same price, you're getting even better performance, durability, and versatility. We also have UL battery certification and offer a two-year warranty service. Don't miss out on the opportunity to get your hands on the Titan 2025. For those looking for a touring e-bike that won't break the bank, the Titan 2025 is the perfect choice.

Product Specification :

Basic Info	Product Name	Titan 2025
	Color	Grey
	Product Size	1850*710*1070 mm
	Tire Size	CST 26*4.0
	Saddle Height	810~1040 mm / 31.89–40.94 in
	Net Weight	37.8 kg / 88.33 lbs
	Gross Weight	47 kg / 103.62 lbs
	Maximum Load	200 kg / 440.92 lbs
	Rider Height Range	155cm(5'1") – 200cm(6'7")
Vehicle Parameters	Frame Material	Aluminum
	Max Climbing Ability	Front oil suspension (60mm travel)
	Gear System	9–Speed
	Brake Type	Four–piston hydraulic disc brakes (with cut–off)
	Drive System	Rear hub motor
	Pedal Assist	Torque Sensor (Mivice S200)
	Top Speed on Throttle	6 km/h (3.7 mph)
	Top Speed	25 km/h (15.54 mph)
	ECO Range (Pedal Assist)	115.65 km
	Water Resistance	IP54
Battery Parameters	Battery Voltage	48V
	Battery Capacity	696Wh
	Low Voltage Protection	39±1 V
	Battery Type	Li–ion battery
	Removable Battery	Yes
	Charging Time	5 hours
Motor Parameters	Rated Power	250W
	Max Torque	55 N · m
Other	Headlight	LED
	Tail Light	LED
	Cruise Control	Switchable
