

## Fiido X, Find Your X Factor

The Fiido X is an industry-leading foldable e-bike. It was launched in July 2021, topping the Indiegogo chart as the first e-bike project that raised over \$1,000,000, going all the way to above \$1,500,000 on the crowd-funding site.

A flagship that builds upon multiple best-selling Fiido foldable e-bikes, the X aims to achieve perfection in design and riding experience. It is a product of two years of work in user research and product development, boasting ten innovation patents.

The design of Fiido X exudes minimalism and is cemented by a one-piece magnesium frame and aerodynamic design, ensuring an innovative look with great lines and shapes. By concealing the parts that facilitate folding, the Fiido e-bike cleverly avoided the pitfall of looking clumsy, which plagues the average e-bike. The design of the X is years ahead of its time, and it gives us a glimpse into the technology of the future.

In addition to its excellent design, Fiido X delivers a riding experience powered by the latest torque sensor technology, which opens the door to a much more responsive and intuitive experience when pedaling. This new torque sensor, combined with a 40N/M high torque motor, makes it effortless when riding on flat roads or traveling uphill. Then comes the 350W silent brushless motor and 36V high-capacity battery that helps reach a range of 80 miles. Finally, the outstanding geometry and dropper seat-post makes it a one-size-fits-all e-bike for anyone between 5.0 and 6.5 feet.

Meanwhile, Fiido is launching an App that facilitates smart socializing. Fiido X users can link the e-bike with the App, playing with and monitoring it remotely while connecting with like-minded fellow riders and sharing great moments in riding.

### Key features:

- \* Minimalist one-piece magnesium frame design
- \* Innovative concealed folding design
- \* Industry-leading battery sliding track, allowing for cordless battery connection.

- \* Torque sensor
- \* A keyless security system that centralizes power control and prevents battery theft.
- \* Ultra long range of 80 miles
- \* 350W silent brushless motor
- \* Fiido App connection
- \* Shimano 7-Speed gear shifter

Fiido X Spec	
<b>Electric system</b>	Fiido System
<b>Battery</b>	36V 417.6Wh
<b>Battery type</b>	High quality lithium battery
<b>Charging hour</b>	7 hours
<b>Operating temperature</b>	-10° ~ 50°
<b>Meter</b>	LCD meter with USB port available
<b>Riding mode</b>	Electric assist mode+Pedal mode
<b>Motor</b>	250W / 350W
<b>Range</b>	80 Miles
<b>Torque</b>	Torque Sensor
<b>Braking system</b>	Hydraulic disc brake
<b>Frame</b>	Magnesium alloy
<b>Net weight</b>	19.8KG
<b>Input voltage</b>	100~240V
<b>Max load</b>	120kg
<b>Tires</b>	20*1.95inch
<b>Folded size</b>	870*400*740mm
<b>Bike size</b>	1480*570*1150mm
