

Fiido Launches T3 and T3 Max, the First Cargo E-Bikes with an Integrated Portable Power

Berlin, Germany – June 23, 2026 — E-bike brand Fiido today officially unveiled its brand-new cargo electric bicycles, the T3 and T3 Max.

Fiido's all-new T Series seamlessly merges the high efficiency of a utility cargo bike with the convenience of portable power station. As the industry's first innovative lineup to feature an integrated energy-storage battery design, the T Series features a shared, removable battery system compatible with both T3 and T3 Max. The same battery can be used across models and supports external power output, enabling it to function as a portable power station for charging a wide range of devices. They can also double as a mobile power station to charge various devices. This pioneering design better caters to the diverse demands of daily family commuting, outdoor adventures, and commercial logistics.

By unlocking ultimate freedom for both riding and outdoor power, Fiido delivers a truly versatile and convenient new mobility experience for users worldwide.

Three Target User Groups: Meeting Diverse Needs

- **Family Commuters:** The T3 perfectly handles daily commutes, school runs, and weekend grocery trips. easily managing all aspects of family urban transport.
- **Outdoor Travelers & Camping Enthusiasts:** The dual-battery T3 Max variant provides an ultra-long range alongside outdoor energy storage, eliminating power anxiety in remote, off-grid environments.
- **Small Businesses & Delivery Couriers:** With up to 200kg load capacity and a flexible, cross-compatible battery design, the T3 & T3 Max boost efficiency in commercial delivery scenarios.

Four Core Highlights

Industry-First Energy Storage Battery: Power On-the-Go

The Fiido T-Series reimagines its massive 972Wh battery as a portable power station. It can effortlessly charge and power devices like smartphones, drones, laptops, and portable refrigerators. Whether for city commuting or wilderness camping, it handles both transportation and power needs simultaneously.

Multi-Functional Mobile Power Hub: Seamless Power Sharing

The T3 and T3 Max feature a standardized, quick-release battery interface that allows for tool-free swaps in seconds. Both models support cross-compatibility: if a T3 Max

runs out of power during a group journey, its battery can be directly swapped with one from a T3, ensuring extended range and a stable power supply for long-distance trips.

Powerful Performance: Versatile Cargo Capacity & Ultra-Long Range

- **100Nm Mid-Drive Motor:** Delivers robust torque, allowing the bike to conquer steep inclines effortlessly, even when fully loaded.
- **Payload Capacity up to 200 kg:** High-strength aluminum alloy frame engineered for heavy loads and demanding commercial deliveries. (T3 Max features a 200 kg load capacity, while T3 supports up to 150 kg.)
- **Massive Range:** The T3 Max dual-battery flagship version expands total capacity to 1620Wh via a spare battery, achieving an impressive range of up to 200 kilometers for long-distance travel.

Comfort & Stability: All-Terrain and Family-Friendly

- **Puncture-Resistant Heavy-Duty Tires:** Built to adapt to diverse terrains, from smooth city asphalt to rugged gravel paths.
- **Suspension Front Fork:** Ensures exceptional riding stability and comfort, even under maximum load conditions.
- **One-Size-Fits-All:** Highly adjustable handlebars and saddle eliminate rider height limitations, making it the perfect multi-generational e-bike for the whole household.

From Daily Commutes to the Great Outdoors

The T-Series perfectly covers two highly frequent, real-world scenarios:

Built for Heavy-Duty Urban Use

A father rides the T3 Max to pick up his two children from school, with the rear rack fully loaded with family groceries. Meanwhile, the mother rides the T3 to commute to work, effortlessly weaving through tight European city streets thanks to its nimble frame. The T-Series provides a comprehensive transport solution for modern families.

Outdoor Exploration with Reliable Power

A group of friends heads out for a weekend camping trip on T3 and T3 Max e-bikes. During the trip, the T3 Max's 972Wh battery continuously powers their drone, smartphones, wireless speakers, and a portable fridge. When the primary battery is depleted, they seamlessly swap in the T3's battery to keep the outdoor fun going. This integration of energy storage and battery-sharing completely eliminates outdoor power anxiety.

Pricing and Availability

While premium electric family cargo bikes in the European market frequently start at over €4,000, the Fiido T-Series offers a highly competitive price point with a strong feature set.

The product lineup is available for purchase in Europe starting today. To provide customers with more convenient service and support in Europe, EU-market units will be made in France.

T3 (Compact Multi-functional E-Bike): Only €1,899

T3 Max (Long-tail, Single Battery Edition): €2,299

T3 Max (Long-tail, Dual Battery Flagship): €2,999
